New Probation Case Count by Offender

The total count of offenders with probation cases that started in fiscal year 2015 was 25,125. Of these, 11,647 offenders were new intakes to DOC.

Offender Risk Level and Criminogenic Needs

The offender risk level represents a calculated likelihood of the risk to re-offend and is used, in part, to determine how closely offenders are supervised.

Criminogenic needs are attributes of offenders that are directly linked to criminal behavior. Effective correctional treatment targets these dynamic criminogenic needs through interventions and case plans.

The following graphs show 15,999 total offenders on probation who completed an intake assessment* between July 1, 2014, and June 30, 2015.

*COMPAS, a research-based risk assessment tool, is used to identify offenders' risk level and criminogenic needs.
